

iStopMotion

*The easy way to animate your story,
one frame at a time.*

Try iStopMotion for free for 30 days and look for yourself how easy it is to animate your story! boinx.com/istopmotion/edu

What are the advantages for students and teachers?

Using animation, students learn to work in groups, to be creative, to research for information, to create text and sound and share their ideas. They learn while having fun, because planning and creating films is a lot more exciting than just watching dry, everyday presentations. And, they can proudly share their works with friends and family. Students can use Time Lapse techniques to assist learning and create interest in a range of curriculum areas. Plus, it's great fun for students and teachers!

- Use iStopMotion for a wide range of subjects and projects across all ages
- Combine Subjects—for example, create the characters in Visual Arts, write the story in a language course and create the sound track in Music
- iStopMotion is easy to use and you can find a lot of information, resources and tips about animation on the internet
- Digital movies can be shared easily through the Internet or school networks

"This is the kind of software that makes the user feel it was created just for him; it's simple to use, it's deceptively powerful, and it's tremendous fun. It brings purpose to the digital lifestyle, making it more than a marketing phrase for Apple."
- Kirk Hiner, applelinks.com

What to do with iStopMotion in the classroom?

Let the following simple ideas be your inspiration. There are thousands of projects that can be done with iStopMotion and your digital camera.

- Watch a flower opening its bloom
- Record changes in clouds
- Observe the chemical dissolution of different metals in acids over time
- Watch living cells develop and grow
- Observe ants feeding or tunneling in an ant farm
- Observe the growth of plants or germination of seeds
- Create an animation which demonstrates the stages of a plants growth
- Promote art at your school by creating animated advertisements
- Write a poem and then create a clay animation from it
- Animate a fiction story or an historic event
- Illustrate vocabulary words
- Create an animation demonstrating the concept of fractions
- Demonstrate with clay how concepts and equations are solved

Why use iStopMotion?

iStopMotion is a very cool application to do animation. With an elegant and easy-to-use interface, it has many features that make it very enjoyable to animate and will inspire you and your students.

See what you do

With the live video preview superimposed over the last captured image, you can see exactly what will change in the next frame. This helps you to create smoother, more sophisticated animations.

"iStopMotion rocks! It makes the complex task of animation easy and fun. Even students who shy away from computers gravitate to the program." James Billings - Apple Distinguished Educator - USA
